PROJECTS

Construction ERP System – DYNASOURE CONCRETE TREATMENT

[GitHub](#)

(Next.js, MySQL)

- Developed a custom ERP for a company engaged in underwater construction, supporting multi-site operations across HR, manpower, site management, BOQ, procurement, inventory, assets, cashbook, and project tracking.
- Built end-to-end workflows for payroll, procurement, inventory, BOQ-based budgeting, and progress monitoring, including attendance, wage calculations, purchase orders, stock movements, and reporting.
- Implemented RBAC & PBAC to enforce secure, fine-grained access for employees, site engineers, managers, and administrators.

Temple Management System – Ganesh Mandir Sansthan, Dombivli

[GitHub](#)

(Laravel, React, MySQL, WhatsApp API, Cron Jobs)

- Developed a full-stack system to manage daily donation and pooja receipts (~70/day), hall bookings, and automated reporting.
- Integrated WhatsApp API to automatically send receipts and reminders, reducing manual communication efforts.
- Implemented cron jobs for scheduled notifications and generated financial & operational reports in real-time.

(Laravel, MySQL)

- Designed and developed a comprehensive pharmaceutical CRM and reporting system to manage sales hierarchy, doctors, chemists, stockists, and marketing activities.
- Implemented multi-level approval workflows for grants, promotional schemes, and marketing expenses with automated email notifications.
- Built modules for doctor-wise business monitoring, ROI accountability, free scheme management, and customer tracking to measure sales performance and return on investment.
